

BOTTLE RINSE

The **BOOTLERINSE** is a no hassel, safe, efficient unit for cleaning your containers.

BOTTLE RINSE kills all bacteria, virus, spores, and algae while rinsing with high concentrated ozone enriched water.

Ozone oxidizes the organics in water that cause ninety percent of undesirable taste and odor problem.

Ozone rinsing is faster than all other purification methods

How It Works

- Place bottle upside down on collar in unit.
- Press and hold botton located on top of unit for 10-15 seconds.
- Let bottle drain.
- Remove Bottle

What It Does

Rinses bottle with four times the concentration of Ozone Water that is needed to kill bacteria, virus, spores, and algae. All of this is done without leaving unwanted soap residues, taste or odors in the bottle.

Allows for accurate monitoring of water sales, due to the elimination of washing bottles at the metered FillStation.

Ozone Facts

Ozone kills bacteria, systs, algae more than three thousand times faster than chlorine.

Ozone oxidizes the organics that cause ninety percent of taste and odor problems.

Ozone is faster than all other purification methods.

Specifications

Size: 69H x 43W x 22D

Water usage: 2,9 G.P.M. at 40 psi each side.

Ozone concentration: 1.1 ppm into bottle with both sides in use.

Electrical control circuit: 24 V

Ozone generator: Corona Discharge electrical 120V with B.F.I. protection.

Plumbing: Water inlet 3/4"; Drain 1"

- All components and materials are either NSF/FDA/UL/ETL/ approved.
